The Mercedes-Benz W211 is the internal designation for a range of vehicles manufactured by Mercedes-Benz E-Class, from 2002-2009 in sedan/saloon and station wagon/estate configurations -- replacing the W210 E-Class models and superseded by the Mercedes-Benz W212 in 2009. The C219, marketed as the CLS, was introduced as a niche model in 2005, based on W211 mechanicals. Launched in 2002 for the 2003 model year, the W211 E-Class was another evolution of the previous model.

This essential guide clearly explains the American Institute for Steel Construction (AISC) Load and Resistance Factor Design (LRFD) Specifications and Commentary, enabling readers to conform with and profit from the design aids and tables in the AISC Manuals of Steel Construction, Volumes I and II. It provides readers with valuable specification interpretations, analysis and design examples, and graphs providing ready-made solutions to complex code formulas. Special features of this practical volume include quick and economical beam selection tables, detailed truss design examples, and coefficients for shears, moments, and points of inflection. It contains a variety of numerical examples, along with discussions of material specifications. The design requirements included in the LRFD specifications are arranged in an accessible manner, making it easy to pinpoint the design of specific elements. This single-volume resource offers structural engineers essential material necessary for designing efficient structural steel buildings. Engineering students in related courses will find this book invaluable for understanding and becoming
